1.0 PREAMBLE

1.1 Introduction

The Economic History syllabus covers the last two years of secondary education (Forms 5 and 6). The first four years of secondary education laid a foundation for in-depth study of Economic History. This syllabus covers some of the earlier themes in greater depth and breadth and also introduces new themes. It focuses on economic developments in Zimbabwe, the region and the wider world. In order to safeguard Zimbabwe's important national heritage it is crucial for learners in Economic History to acquire skills and knowledge on how a society gains its subsistence, organises trade, business, financial institutions, employment creation and utilisation of resources such as land. The syllabus is also designed for learners from diverse backgrounds and also deals with the changing economic status of both men and women from the Stone Age to the present. It seeks to promote Unhu/Uubuntu/Vumunhu (societal norms and values) and to instil patriotism in the learner which are critical for nation-building and responsible citizenship.

1.2 Rationale

The syllabus provides learners with a critical understanding of production, consumption and exchange of goods and services in Zimbabwe, the region and the international community. It also fosters an understanding and appreciation of economic indigenisation, empowerment, gender sensitivity and democratisation of resources. In addition, the syllabus promotes in learners the realisation that there is need for sustainable utilisation and conservation of resources as our economic heritage. The understanding of Economic History helps the learners to make informed decisions and prepares them for diverse vocation and creative businesses. The methodologies employed in this syllabus are inclusive in their approach. It responds to the need for responsible citizenship, Unhu/Uubuntu/Vumunhu (societal norms and values) and patriotism.

1.3 Summary of Content

This learning area covers major themes in Zimbabwe's economic history and other parts of the world. It includes the study of indigenous economic systems, the economics of slavery and Slave Trade in Tropical Africa, the development of capitalism and economic thinking. It also conceptualises war and how it has shaped economies in the 19th and 20th centuries. Learners can also

draw lessons from the labour dynamics in Zimbabwe, international recessions and depressions, Zimbabwe's economic successes, challenges and solutions, health and economic developments, resource management and utilisation, formal and informal enterprise in Zimbabwe and China's involvement in Africa.

The Economic History syllabus enables learners to develop skills in:

- Problem solving
- Critical economic thinking
